The world is divided by great reset—liberal camps and groups of China, Russia, and Iran. We propose the 3rd pole.

This comes with economic and military cooperation facing coming reality. All these are tailed by agreement to unify the world under the same philosophy.

We see two divines with the Liberal camp, China, Russia, and Iran. One with the new world orders the other against it. That means we seek the opportunity to take colossal reality to build under its philosophy.

We may imagine that Armageddon among two groups but we are trying to steal the world

The economy is under a new unified digital currency by its use and we are moving its army under the same control.

They have their plan to go, which is called great reset. That means the military complex is trying to make wars with the economy and military. They ask for the same money system they are trying to proper the world. We are making our actions.

We rise a revolution to gather our group as far as we can. There must be more than any agreement in the world.

We, Kuroda International Consulting is willing to participate in all new movement as far as any help from ours.

How may we ask for reflection from Africa and South America? And all revolution that who is willing to put themselves within.

As we are trying to cooperate with the universe as aliens, they are asking for the same future that we have to know.
