

A new world under International agreement by-laws

KURODA International

Takeshi Kuroda

With the invasion of Ukraine and all inhumanity actions we see in the world, we are asking for a new world through new agreements.

We must be given under international laws with all agreements of humanity standards. China and Russia, like the others, must be asked for a contract to participate with the world and new cooperation.

We are not asking for any tragedy in the future. Under all new laws, we may not ask for inhuman action in the future.

These are the world's agreements, and we may seek the unification of the world under all these agreements.

As all we have in social problems, we are trying to solve them under agreement and laws of its given.

These are the world's creations, and bases make it possible to share the new world.

These are based on Western socialism, and we are trying to participate in a new agreement.

Based on all agreements that we may share, the future on this planet and understanding could ask for a new future.

An agreement could give all permission to seek a new world on its base.

International society is proposed by a new agreement by KURODA International with all support of the Asia Union.
