Create the future

Reconstruction of the world under new responsibilities

KURODA International Foundation

Takeshi Kuroda

This is an age with a new generation. There is a turn from history to the futures. Waiting for a space age.

Asking reconstruction from new responsibility. Due to asking for all govern with the world. New age should be a luck of all responsibility but right. This new trend must know all responsibility for any field of society.

Only permission we could ask future may be with a new responsibility. As social demand with responsibility as to ask the futures with a new possibility.

This age of Aquarius has whole new participation to a new future. New social system with technology could ask new futures with all its possibilities.

Academics are creating whole new possibilities. This historical change is as Next society from PF Drucker that is not any illusion.

All determinizations with politics are all possibly to ask the futures. These are as same as all responsibility for any participation to the world.

We could imagine that the future is waited for a new possibility we could guess as any progress of ages.

There we could ask all determines with all politics to see all hopes within eyes of all children.
