

Age of new China

Kuroda International Foundation

Takeshi Kuroda

New peoples age is given. That all their history never permits any freedom of peoples. This rising up all dragons is all new Chinese realities.

Even in the dictatorship of the Communist Party that all their people's hobbit has never stolen. We could imagine what free China could give themselves.

These are with new life style of the world. That is a new peoples age of reality. These are some of its revolution of new reality.

But national system and inhumanity political reality could not afford to be participated with the world.

New life style has all excitement ever that what they have.

These are as same as all revolutionary reality within America. People is egger to rise up themselves.

These are new reality of the world with new peoples ages. But asking to politics they may not answer. This is even as same as America.

Peoples age with their freedom may be considered how the world and future should be.

Democracy and populism could answer all questions? That what I can find is the world must struggle all realities.
