Agreement of non-intervention in domestic affairs

Kuroda International
Takeshi Kuroda

There are different from any realities we have, but all its bases give a new future. All representatives of the nation are permitted domestic affairs. To provide a new reality is under all permissions.

Diplomacy is possibly allowed to seek the future as we may seek any steps to see its vision. These are under any reality to ask for new possibilities.

There must be a place called United Nations, they may ask for concern, and we ask for new participation.

Besides with new world order, we are trying to seek a different possibility. Gently we are asking for further steps.

If we could make an entire agreement by non-intervention in domestic affairs, we could ask for new cooperation.

Not from conflict but share the peace that may be a dream but worth trying.

We see army forces there, but we may ask only permitted to participate in all reality under its reality.

Not from existing but new way to try with a new vision of the world.
