

Agreement on the peace

KURODA International

Takeshi Kuroda

Peace is all worth by dreams. We can work on that.

International society could agree to solve any tragedies in Ukraine. As for the future, we may abandon wars to unify the world.

Peace is on any bases we may ask for in the future.

We may propose peace, but peace causes the reality of harmony from conflict.

We may imagine what peace could give the world. It must be the future.

Any cooperation is possibly under peace that may create a new world.

We can recreate the world under all new agreements.

In history, we have all pain and suffering during the wars. Wars occupy all past. That is all reason we could ask same opinion and understanding to construct peace.
