

Armageddon

Kuroda International

Takeshi Kuroda

Waiting for a new era, we must be through Armageddon. This is the end of history and facing any reality of the world.

Any description of the bible may not be ignored. According to any details, we may find how we expect the world tomorrow in a book.

All economies and politics must be faced up all those realities. Any reality must move on to the future.

All people must see all these truths and face equally to the future.

There must be all judgment to political actions since this goes with any realities.

We must follow the light of hope. That is the only way to reach the future.

We may ask God then what we may find with an answer.

This causes the end of history as we may seek the future.

If John's apocalypse is a truth, we may find a future.

If Armageddon asks for victory and defeat, who own the world and future?

An uncertain future is always a law. We may ask its best of our effort.
