Create the future

The world and reality, future and decision

KURODA International Foundation

Takeshi Kuroda

Only may handle with reality that is all participation we can ask the futures.

As the world is included with World War 3 and new world government with all their hope and futures. Politics may ask own decision.

Dreams may not face any realities. That is all duty with politics we can face the world.

Reality of the world is trend and priority, Wars to see in a plan. Only we could ask any steps within.

To face all reality army forces are only permitted to face equally to the world.

NATO is all remarks we have to know how we could cover the world. That we need a justice against them.

Mass incitement and guidance are right way to handle all realities.

War against wars that justice and mass incitement, army farces could ask all revolutionary wars facing equally to the world.
