

Bases into an alliance with Europe and for the goal we are agreed

KURODA International

Takeshi Kuroda

The goal is the unification of the world into a unified government. We are trying to create new laws and rules.

This alliance gives any decision to a new world. We design laws and rules and ask for any participation by any nation and region, even of race and nationality.

Any moment we spend in history is the same as any reality we may seek for an eternal future. The winner always has a decision.

The alliance with Europe is the equal relationship we offer, and only any acceptance of any nation under its volunteer is a law we share agreement of decision by the world.

This is truly the greatest of reach due to the east and west had had a history.

As we are sharing the same future, that must be an equal partnership and agreement we offer.
