

Basic income and a new social system

Office
of
KURODA International consulting
Takeshi Kuroda

Basic income must be served to participate in social activity. That is all from regional government to give right for basic income. It is a whole related industry and all business environment and builds a new social environment.

The new social environments are from now the progress of all technology and system. These cause all progress of life and society.

We are asking to reconstruct any reality to settle in a new social environment. New investments for social infrastructure and communication systems are based on building contemporary society above society's 5.0 standard with cooperation from any industry.

Under the agreement of basic income, life is guaranteed. Even the living environment must be served as any government effort.

All technology and any progress in academics must ask for used in any field of society. Honestly, it gives all efficiency improvement, which means with new cost standard and comfortability we may seek life.

It is so close to Next society from Mr. Drucker. It has all use, and any industry must be given any standard with political cooperation.

We may consider that any national environment provides a learning environment and permits participation with essential educational skills.

These are from new socialism, and a new system of society must guarantee all people with new future through political effort.
