

Business idea

2021/8/17

Takeshi Kuroda

Bases with personal idea to seek business. To be participated with market and ages. Any excitements that we create.

Technology and product could access the market and ages and to create the new life style.

/ Idea

Multi card with an unification of all card service

In the society we may find all card services. We unify all card within an one.

Memory and writing under the standard. Card with memory and IC tip and own security. Fintech service and own ID access could fill up with own service. These are related all IOT environment and access to all ages.

With all connection to sell phone and computer may ask other possibilities and service. These provide ID service and one access to all social service. And even with IOT access.

Bases with Fintech service within that we could fully access to all service in Internet and society.

All these services are not only unification of card service but all unification of ID service with any services in the society and Internet.

Any use could host with Server and may access with any data of use. These cloud service could be accessed from computer and sell phone.

KURODA International

Detailed plan to realize own business

/ Development of card and to be participated with existing standard and use of card with reader. Touch service is commonality with sell phone.by application.

Asking to construct own IT server and system, and bases with personal bank account to provide Fintech solution.
