

COVID-19 and after

Kuroda International Foundation

Takeshi Kuroda

All financial aid to economy remains after and middle of COVID-19. Government finance is considered after COVID-19.

As any forecast could base upon these circumstances. And there is coming future with new technology. These are right understanding for all reality today.

There are all changes waiting after solutions. There should be a plan and reality may not be away to life and nations.

Handling all these realities is all duty and responsibility of politics. Could make all proof with any realities.

That is all proof that politics have all decisions.

May find hope with the futures is only from politics. Peoples could dear any politician but realities.

This is all different from populist and real politician. Who could handle all realities? All people must seek god.

But facing with reality is only a possibility and may not dream but standing against the world.
