

Change of the reality and any action for the future

Kuroda International

Takeshi Kuroda

Waiting for all plans, they are ready to forward their future. It means the world is looking forward to changing.

There are new world order tails and everything of the reality that we are only permitted to participate in.

Politics and business are facing equally to the future. We may only ask under the reality of the world.

There are plans we could see the truth by letter to be sent by Mr. Rockefeller to United Nations. Starting from confusion in the Middle East and reaching the world government.

The world changes, and we have to ask about its decision. And above the universe, we are facing a new future.

How could we face the world? In the truth, we do not have a choice but to the world and future.

The world is asking for its end. We are facing the last moment of history.
