

Coming future and all occurring changes in the reality

Kuroda International consulting  
Takeshi Kuroda

There is a forward with the change as we have a difference in life caused by the new world. There are matters we may experience a new reality in all changes.

Political actions, wars, epidemics, and new economic realities may be expected in the future. We may be sure that we are right in front of confusion.

There must be an agreement of the world that is coming future we are now facing. These are under the purpose of creating a new world. We may build our reality then.

The decision belongs to all. Asking for permission to build a reality is a question we must ask. Are there any vacancies we could ask its decision?

Reality has covered any realities under plan and decision. It comes from gathering any political environment willing to make their world.

They have a great reset. They are seeking their world. We are trying our great reset to disclose all information to build our world.

Expanding with our world order makes a new world under its unification by the world government. All these are under agreements to share the same future.

We are making a fundamental change in the world under truth. We give all judgment to any realities and create a new reality by expanding any possibility to cooperate with the universe.

We may say that we have a dream. Comes with our world. We are the kings.

We could realize all our plans to reconstruct any reality of the world.
