Create the future

Consideration of world history and progress and future light

KURODA International Foundation

Takeshi Kuroda

History has a drama in the West and the East, and all the peoples with the world have that unity today. The West seeks progress in academics, and the world is obedient to it today. No one is eternal in war to build own empire, and no one makes its glory eternal. Technological progress has the creation of a new world today.

History has its battle, and the empire in the winner has a past in forever.

These technological advances give the formation of overwhelming power, and power calls for the end of the conflict with justice today.

The history colored in the war makes the glory of the winner the only reality.

History calls for its liquidation and demise.

Today the world makes possession in the Illuminati a reality and seeks eternal glory for the end with the world war.

Equal forces that confront this seek proof of their justice in history.

These are obvious sarcasm. The winner loses victory and becomes a slave. He is clearly a king with a past and will be a slave in the future.
