

Considering Russia with its invasion.

KURODA International

Takeshi Kuroda

Any action as Russia makes his attack under army force that gives us unusual behavior. His attack kills more citizens, but international society gives its decision to humanity.

All army deployment must be determined as childish, but we have to see that they are missing something.

There must be all curiosity that international society may not give any solution not only with menacing nuclear force.

Ukraine must be fear of Russia's Nuclear weapons. That comes they may not ask for their decision.

Russia must be missing its purpose. It shows their running of armies.

The USA may not stand a war against Russia's Nuclear weapons. But if Ukraine has a nuclear weapon, we may consider nuclear wars worldwide.

Mr. Rudolf Hettler lost his nerves. He might not have a proper judgment. If we have as such as he is in this world, we may not escape world wars.

It gives an idea that the world must change and that we may not find the future.

The world may not be away from the coming future. We didn't find the heroes.

With all truth of the world, all confusion may not deny and reject its future.

Russia is a completely captive tiger. He must ask for his choice.
