With the high trend of life and its comfortability moving into the IoT age, they have a top presence worldwide.

Elites with the highly educated are creating a new world. On the other hand, we may find who failed, but the time of trend gives new life to riches.

Space and military technologies go to new generations under new academical standards. They are prepared for free trade system to attract cutting-edge factories and monopolize advanced industries.

Their absolute strength lies in the freedom of their people in liberalism and their excellent living conditions.

Their plans for social improvement are always commendable compared to other countries worldwide for their social infrastructure.

All these realities are expanding to their future. Trump's unilateralism magnifies the comparison between world poverty and America's prosperity, and the world's loss of order proves they are responsible for it.

Their educational environment and university research create the future, and their soundness is proof of the correctness of their upbringing.

This means being are not tooled but asking for its purpose in the future. That is called the dream that they realize in their world.

On the other hand, we find all poverty in the world, and we have to know that to reach their condition is a requirement of all nations.

We may wonder about the wood called the future. They are more than eager to seek their reality in a massive change of reality today.
