

Construction of the new society

KURODA INTERNATIONAL Foundation

Takeshi Kuroda

With a full design of society with political plan could realize correct life living environment with the highest progressed technology. There is more than any necessity to build right living environment.

As reality you can find within United State of America is right social design we can find as from all roots with Europe. All the highest technology could ask more than any imagination to the futures. These are all reality with a new growth of now ages.

These live living environment proof with birth rate. That means we have to follow and learn from France. All these are full requirements of understanding with politics to ask plans.

And all these bases are from academic bases with any participations from university and design.

Technology gives more than any progress of society and lives as you can find all new trend of ages.

These we can find all possibilities even to the futures. All these are all necessity we have to make with politics. With 3rd development nation to be found that plan should more then any required to reach same condition with such as America and Europe.

Political plan realizes all social environment out of any failures. Even zero environmental stress anew as new society.

These are bases with right understanding and bases of plans.

Office to access the world.
