

Coups around the world and their justice, and the return of self to unilateralism as a landscape of the America

KURODA International Foundation

Takeshi Kuroda

The reality in the coup is only the confrontation with the New World Order is its justice. The People's Republic of China will lead this. But it is impossible for them to win.

The return of America to unilateralism will create a new world in reality in the alliance of Caucasians, and in its cutting-edge industry and self-society, a reality is far beyond imagination.

The new framework in NATO and AUKUS has a plan to create a world as the king of a new world in Jewish and WASP.

These ruled the 20th century, the justice of Western civilization no longer exists.

In these new worlds, the conflict between Western justice and the inhumane world has the unification of the world and the transition to world government.

The solution to these realities is to share the world's judgment on information disclosure and participate in the future.

To confront the overwhelming reality of the Western camp in terms of self-justice and legitimacy, I would like to propose a future in the harmony of the world.

These propose the possibility of the transition from all conflicts to dialogue, the abolition of war in the world and the existence of future cues.
