

Creation of new economy

Kuroda International Foundation

Takeshi Kuroda

To serve any necessity of lives with new technology we could propose new economy. Cost and efficiency could be based with IT and Industry 4.0.

These have new possibility to build own business caused with new economy. These IT and business system propose new style of society and lives.

With a high proficiency may cause from new system that could dream new economic systems. There is new society as any growth of new we can find with the world.

These correctness of company bases with new technology and system may only permit to be participated with market. These we can find 2 difference of reality.

There is all creation of new life style with growing of all new business. All these have all its possibility we can work for.

These new economies are already existing and forwarding to all new creation with reality. It has the highest efficiency caused with IT System and a new business standard.

Progress of MBA we can reach to know all business system and creation own ideals with a field.

CSR as any cooperated with a community give new participation to society and the world.

New technology and design offer new potential of lives. There is a new elite who have more than any skill and knowledge with all creation of new.

As I recommend to make bases of basic income should expend new economy and system, and we may ask new society bases upon those.
