

## Defining the Palestinian conflict as the last opportunity

KURODA International Foundation

Takeshi Kuroda

The Israeli-Palestinian conflict has a clear transition to World Government and World War III. This gives the reality that the rough sketch of the New World Order, previously sent by Mr. Rockefeller to the United Nations, is true.

All Asian alliances propose to take the opportunity of these conflicts to participate in the reality as soon as possible. The Asian Alliance proposes to cooperate with the uprising of the Islamic holy war in OPEC.

Disclosure of all information builds one's justice in the world, ask the world, and raises a revolutionary war.

Since these have World War III with the World Government, we call for public discussions on the stage of the United Nations, which are advertisements and for the division of the world together with the resolution of the Security Council.

The polarization of these worlds is divided into two by the New World Order and the allies that oppose it. These are as planned, but disclosure of information and establishment of justice in the world enable a revolutionary war.
