create the future

Dividing the world into two and dealing with it

KURODA International Foundation

Takeshi Kuroda

Participation in the future of Western justice and justice against the New World Order in the inhumane world requires participation as a third party due to both sides having mistakes.

These should seek a clear self-idea and cooperation in the world for the correct world and future demands, and seek a distance from the reality of pursuing individual interests and demanding hegemony to the world.

These are predictive of the reality of Armageddon, and cooperation for the perpetuity of the world and the future proposes participation in different positions from these.

These objective reality judgments realize the construction of self-reality in the judgment of the reality of the world and the sharing of the future, and realize the power of the transition of own security and profit

These form the third party for the dichotomy of the world.

These will build the reality with the establishment of the World Government in the Illuminati and the coping with World War III in mind.

These want to seek the formation of a third party in the unification of Asian countries, and seek participation in acceptance and self-idea in the world.

Disclosure of all information will establish self-validity and respond individually in changes under individual reality.
