

Education and the society

Kuroda International Foundation

Takeshi Kuroda

To give a right growth of being are with education and society. With anew ages politics has to make anew of itself.

Health of mind and social skill, learning experience permit right participation to the futures. That we need to build right environment with political decisions.

Society asks own responsibility to all children. And Society with a new life may seek himself with right environment and own systems.

New technology is new use to ask them anew. That is all agreement to give a right self and futures to all children. With a free of charge to ask any opportunity of all education to them and all youth may end own education to the college,

Moral and conscience give right growth of all children. Any environment must be prepared for all education.

Self of being may be needed with right growth under right environment and asking social skills, to gain right humanity of learning, academic learnings. These are asked as responsibility of the world.

All school are asked to give right of self to all children. These are all decision to be required of politics.

Humanity is any agreement of education and society. All adult is asked all responsibility for all children.
