Create the future

Eurasian agreement and development

KURODA International Foundation

Takeshi Kuroda

The unification and agreement of all Asia calls for the unification and development of Eurasia in the agreement between Europe and Russia. These are the next millennium of the Eurasian region as the center of the earth in the development of regional core cities in the institutional transportation network called Hyperloop and smart cities, the development of regional infrastructure in the next-generation transportation network, the development of unified communication infrastructure in IOT, and the agreement on space development. We would like to ask the harmony of races.

These will be developed and planned centered on AIIB, and regional development will be carried out.

I would like to request the participation of regional nations such as the Eurasian Conference and the establishment of cooperative relationships in agreements.

These realize new possibilities and redevelopment in agreements and plans. Development in next-generation technology will realize a new society and life.
