

Facing all reality to Afghanistan with Taliban

Kuroda International Foundation

Takeshi Kuroda

Under all decision with International society is all reality we could even face all reality. As facing equally, the other reality as China and Russia may be considered to face all reality with Afghanistan. These are a humanity consideration from west and these are equally all bases with any human beings.

There are all truth bases of the world, but even with those humanity decisions may be accepted with any decision to all realities.

That means we could try own best to solute any confusion. Own independence could ask to solute self.

Any discussion with international society could be equally disclose tails of the world and equally face to discuss any issues.

Remarks are how Afghanistan could ask their futures that what we could do for them.

And govern under western justice may not be every solution we could not be asked, due to be proofed all reality of the world.

That require the other choice and futures the world could face to see the futures.

There are all remarks that United State of America did asked own justice to the world, and it gives the world today. Those are not any wrongs but reality of today could ask difference from to the futures. That reality could not afford under all those.

Justice could govern the reality but all peoples are asking own freedom. This is more than irony we can find with the world.
