create the future

For Considering of GAFAM

Kuroda International Foundation
Takeshi Kuroda

New technology and all new creation as company environment and system goes to the futures. They are the measure of the world.

Their capital power and investment are huge mountain, but with own progress and idea may reach as Mr. Jobs from Apple.

Their working style are all its envyness that we could dream.

We can see the future with them. We could dream a future.

Deeply considered that idea and concept could make origin. That is a proof we could create the futures.

Originality bases own learning but only to know business and technology permit own participation.

Own business must be completed with service and products to be compared with GAFAM. That gives only permission to be participated with.

Corporate efforts and ideas give all possibilities. Concept gives originality.

The highest mountain has all its content that what you have to know.

You have to read what gives top trend. Technology and system may not be reached. That requires own idea with a product.

Try to imagine that you are running same measure with own company. That need to know all its knowledge. That only permit own business.
