

For a future

Kuroda International Foundation

Takeshi Kuroda

There are wars with pain and suffer in the history. There we could create the futures. If we could find hope in the history what we could ask own decision to the futures.

Because the futures are always uncertain but determine and decisions. We could face the choice.

With who as great politician may declare to the world. Where as we can find a hope?

Unlimited possibility is reality always lying down what we may ask to those. Is dream must always illations?

With the right measure to all reality we could construct right world and lives.

Out of wars and pain and suffer we could dream the futures. But determines with politics we could seek even a possibility but any technology and academic progress it may not be a dream.

As any heroes in the history they asked own declare to the world and they owned the world.

They stand alone and complete sharing with ideas and give a hope to create the world.

How we could find unity and the world with all hopes? That is all proof we may not ask even an exception with all peoples.

If the justice avoids any peoples they must ask and seek different philosophy.

These are any progresses of the world. Any realities may be asking any step forward to the futures.
