

Foreign affair and construct anew with own nation

Kuroda International Foundation

Takeshi Kuroda

To be in touch with any reality of USA we could ask own decision. They have a new technology and system bases with their industries. Strong bases of society and expand own creation of the futures.

With own foreign affair that under bilateral agreement. Ask abandon of war and vision of new world and futures. These are all bases we could ask to unify of the world.

Free trade system must be known under bases of world reality. That under own national security to ask political plan with own industry.

The highest condition is not what aims or reach but only duty we could run nation itself.

These moves to any age with new standard into any fields of nation. That is moving to computer ages with IOT and society 5.0, industry 4.0.

Reality is only with power politics but all lies that what we have to know. That only we could work for. That require own reality and capitals. That is only way to ask any participation to the world.
