Create the future

For all its solution of poverty

KURODA International Foundation

Takeshi Kuroda

To see the world these are more than all problems not to seek the future but all solution. These is all effort asking the futures of the world in any places within.

If the politics make all agreement with any solution of poverty, there may be asked difference. That means we could ask different futures.

As all confusion as wars, we must be wise to see the world. That abandon of wars could be all agreement and could see the unify of the world itself.

Zero stress of environment even could ask under all agreement of all politics.

There is difference among within politics but any decision of politics.

Economy could ask all hopes to the futures.

What is that there should be asked decision with politics.

Luck of all ability may be asked all educational environments.

These are all creation of the futures under agreement of the world.

Politics has more than ever potentials to create the futures. This is more than all proof to create any futures.
