

Industry 4.0 and new efficiency, caused by new profit standard

KURODA International

Takeshi Kuroda

We have a new reality called industry 4.0, and its productive efficiency systemizes the company.

IT system governs all running of the business. All these systematizations are built under new efficiency standards.

Under all new bases, production costs may be decreased, and a new product price standard is given under all distribution.

These are required under the systematization of all operations under new work efficiency.

Industry 4.0 and IT systems force us to systemize all reality of business. But on the other hand, we own new efficiency with new cost standard.

Systemization gives all new efficiency in running any business, and we are asked for its creativity.

In a new era, we have new creation of reality under all business. These are the creativity we have all excitement of reality. We finally meet the future that must be true.

All businesses are creating the future. That is the point we need to know about the free economic system.

The new efficiency standard can be converted into product cost and optimized profits. All these are the MBA learning we may ask for with a business.
