It is called the economic divide of the world.

Kuroda International Consulting  
Takeshi Kuroda

We are facing new realities as all growth of new technology under creating new realities. It is based on the economy as the liberalism of the free economy.

Economic security is given as same priority as military security. And with both, There is containing different realities in a group.

Under all these visions, how we may calculate with Russia above its invasion?

Expanding to all futures, we could make for its foreign affair to decide all reality of own nations.

How do we face all nations? And waiting for the United Nations General Assembly in September, do we ask for its challenge?

We, KURODA International Consulting, offer by new philosophy to face and handle any reality the world owns.

And we may expand cooperation by its economy as we try under new generation standard.

The ace of spades is always used last.

The unification of the world is given under new philosophy. That is all our decision facing liberalism.

It is the creation of a new world in humanitarianism.
