Create the future

Challenge to find all dreams of peoples

Kuroda International foundation
Takeshi Kuroda

As the past to see to be forced as a labor with all peoples in a reality. But willing to see own lives are as we can find in 20th century of revolution with America. That they are called nation of dreams.

Under any considering with all progress of technology and academics we could ask the futures with a new world. All philosophy are all bases to ask the new world.

We could see all problems as crimes and inhumanity but to stand against the world and may ask the futures.

I believe that dreams are right decision to seek the futures. That all peoples have a right to seek own futures. Politics could ask agreement to build a new world.

Can we see the light within eyes of all children? This is right decision to judge the politics.

Disappointment may not ask the futures but only with any hopes.

Any cooperation is an agreement we could try to seek the same world.

With any considering we can find all peoples must ask own steps with lives but not forced to be that.

This difference is difference with reality of the world standing with Justice of West. That means we could ask decision with self.
