Create the future

Indo-Pacific Initiative and World War III

KURODA International Foundation

Takeshi Kuroda

The Indo-Pacific initiative clearly realizes world domination in Western justice in its last bastion, the siege of the eastern lord of China. Behind this is the plan of World War III. Asian countries are clearly Western puppets, and plans in the US military-industrial complex cannot be denied.

These are that history on Earth has the last struggling in the war of all world civilizations.

These give the world a clear possession of absolute technology and social superiority. These advance to the future of the New World Order.

The new lifestyle of the reality of the West gives nothing but the envy of the world. The reality on the other hand is an inhumane old society, and people's choices in the comparison cannot be denied.
