

Law of the democracy

KURODA International

Takeshi Kuroda

People's decision by truth is a law of democracy. It means people's decision is all decided by the nation.

We have a future in which we need all conversations with all people.

This is a recent age in all politics. Politicians ask for any conversation and make their vision to people.

Expand all information to people that people may have asked for a decision. This is the soundness of reality. We may ask for any reality as to the future.

Politicians must show their vision to the people. That is the decision of the election.

The dictatorship does not have all its freedom of people. This comes with a justice of liberalism.

We reach the answer that all freedom of people is soundness of reality that permits us to ask for any reality so as the future.

This is the establishment of popular sovereignty.
