This is a law in history and the future. Since losers only give an excuse,

And this is a mean of worth of challenge. For any truth, the loser is only away from the future.

We put ourselves into power politics as the reality of the world. And we are only permitted to make any victory against it.

This is a way to conquer any reality; it is the only possibility we have to create the future.

We need to know how we can do it. The answer is to be wise more than any to conquer reality itself.

We need at least the same fundamentals to face any world reality equally. Participation in any reality is only permitted. Otherwise, we have to ask to belong to any reality.

Then, we have the choice to make our diplomacy. Power only makes things possible to make any reality of ours.

Any progress is based on society and life. So politics must work for it, and people must rise above any reality of nation.

Anything we desire is all from people. So we need to improve its environment, including education and university. These are the ideas of a new society and livelihood.

We need to be wise to find a way to the future. These are all requirements of all politics.

Who takes the world is who is the most wise to any reality. This is why we need all talent and human resources. They have a skill to conquer all realities.
