

MBA and efficiency, system

Kuroda International Foundation

Takeshi Kuroda

Production and cost efficiency could expand own business to the market as new access to market with own global participation. These are new possibility to see unify of world market.

Internet and IT system is new access to whole market. These are new participation to new market with all business conditions.

Rising up any efficiency may be caused all new revolution that require new construction of companies.

Systematize own company with IT system and working systems may ask new creation of environments and new business access. That is occurring new waves with all its change of business and environment.

New leap of business is all reality today. All new possibilities are realized under all new business persons. Creation of new business is all new growth today. These are realities different from past but now. Right vision must be with this. That is right action to run own company.

These are different age and growth of new society. All new technology and system are provided with all new businesses.

These are technology and industry revolution as same as 19 Century. There is new efficiency standard with own IT system and IOT condition.

That makes new market standard to ask own business with new market conditions.

These are bases with high MBA academics to seek any business environment. All these have speed of time with more than any imaginations. This is right understanding with all business realities.

Then what is necessity for you to have? Right understanding with market and world top system and technologies. These are condition that all company follows.

Entrepreneurship is all new talent to create new ages and these are covered with capital investment.

On the other hands huge company and capital have control of business. That must be known to handle any businesses.

Right profit is a proof of company effort. All market and competition principle require construction of company equally.

With these there is all possibility with time of moment. But with Covid-19 there is financial debt of increase for government that could ask difficulty to the futures.

These are right forecast to run own business. There own plan is needed to put into the futures.
