

Money game

KURODA International

Takeshi Kuroda

Business under capitalism asks for money games. It allows good of anything, and money is a law.

Waiting for a new Black Monday allows the lowest to buy any stock in its market failure. Huge capital is waiting to purchase all technologies.

All these ironies are based upon capitalism and a free economic system. That is the reason why it is not that it is an evil game.

Under all these worlds, money is king.

That causes us to leave out humanity but only with evils.

These are the new reality of all economies that is a party of new riches.

We may wonder how much of its capital is waiting for the stock market's failure. These are from the Taiwan invasion and expand all changes worldwide.

Let me give you an idea that the king makes control and has everything.
