

Mongolia and Afghanistan, ASEAN

Kuroda International Foundation

Takeshi Kuroda

Growing up own nation with building recent technology and lives that we need to ask all bases and conditions. A clean and planned society and life are with political decision.

Politics with own decision could build own society with any plans. Recent technology and system could ask new society. To raise peoples is creation of the futures.

These to reach same condition as advanced country is needed same education and society as lives.

Foreign affair is any cooperation to build up any possibilities to the futures.

Regarding with Afghanistan, Taliban own nation. With all related CIA and waiting for world war 3 is only a reality we can find. There only we can find political decisions.

ASEAN under 13 council what we can find. Li family is only a king within.

To handle all these realities is only a permission to be participated with all reality.

We all have a choice to the futures. We may only ask death but all leaving wimps never join our world. To disclose all their crimes and move any army forces against.

That is only we can work for.
