

National decision and 1000-year plan

KURODA International

Takeshi Kuroda

Who is trying to ask for responsibility for 1000 years of the nation? This is all determined by politics with its requirement.

Significant ideas and decisions are only permitted under any reality. That comes with all actions and decisions of politics. That rejects all failure but determines.

The world strategy comes to mind.

Who is running away from reality, and who is trying to go against them?

Deeply considered comes differently from an idiot.

Out of any profit of self but an entire profit of nation.

Any national plan is promised under all actions with cooperation from academics and bureaucracy.

Determine should give all changes with a nation.

Any decision makes reality called a future that gives us the idea that we may dream of a future.

To see all eyes of people, we are trying to ask for the future.
