

Our Consulting

January 20th, 2025

KURODA International Consulting LLC

Takeshi Kuroda

A unique idea is to propose an understanding and judgment of reality in its consulting.

Redesigning all reality to the future under any philosophy and challenge to the world.

We have our visions of sharing all new futures, our calculations for any reality of the world, and we ask permission to spend ourselves on the earth.

We all know that we have any reality of the world. This is so confusing under any calculation by commonsense, but we are trying to recreate the world to a new world from a new point of view.

Hope and dreams may not be illusions today. We have all their progress in any reality, and we have even taken our first steps into the universe.

We can redesign the world under new consensus and ideas, creating a new world and future.

We were trying to propose new ideas to all politics and economies to share and make things new.

Consulting may advise you on all new ideas and plans to make your reality progress and solve it. We face all reality equally, which we need to seek for our future.

I do not have any decision, but as we have insisted, politics has a decision for any reality, so we are pleased to consult with you.

But we are not trying to escape from reality; we are creating new things and proposing new ideas for reality.

We are pleased to ask for any decision of yours which may ask for a new future.
