

KURODA International

Create the future

For respect each other to the world and futures

KURODA International Foundation

Takeshi Kuroda

All its reality we can see the world as China siege. These are as same as Japan in World War 2. These are the rule of Western roots.

But trying to be wise that for respect to each must consider new world rules. Any consequence of Western justice could discuss new world even from other identity.

Those humanity bases are all equality of human races. This is right challenge with all colored races to ask equally to participate to the world.

Wealth is occupied and having all control of the world. These are the contradiction we can find with all reality but surface of the world.

Respect must be all agreement we can ask the world and futures. This is more than the best effort and to see the world with self.

These are asking any argument and seeking agreement that we can find any solution with any realities.

Because peace is all ideals we can see with history and the world.
