

Recalculation by humanity in any field of a nation

KURODA International

Takeshi Kuroda

Uighur, in their reality, we have to ask for any improvement by humanity. Human life is an equal agreement of the world.

As Tibet and Hong Kong must ask for their volunteer decision. Myanmar must be asked if it's running the nation under humanity.

Democracy is a decision of the people. There are calculations under western justice, but we may know that humanity is all on equal bases.

They have all progress of society on all these bases. We may know all understanding to be compared with its nation.

These give the reality of the progress of socialism. Liberalism is all permission for freedom of life.

This is clearly their advantage. That means we may learn from them.

These are the progress of reality as they create new futures because all immaturity has a self in the standards of all ages of coercion and exclusion.

These cause a righteous way of participation in the world.
