

Regional politics summary

KURODA International Foundation

Takeshi Kuroda

The local government has agreed to oblige the provision of livelihoods for all citizens, and is self-sufficient in creating a new society at the cutting edge of the times and world.

These environments agree on the participation of all citizens and realize social construction.

The understanding sought is the reality of creating the times and society, and assistance to these vulnerable groups is provided all its environment in local government.

These will be disseminated in the politics public relations to the citizens, and will provide the social construction in the participation of the citizens and the life and participation of the times and all trend for all the citizens.

Advanced systems in the new era want to realize new local possibilities in the use of the Internet.

Participation in the reality of smart cities can propose the creation of a new society, and can be realized through collaboration with Toyota's Woven City, new social construction through inspections, and industry-academia-government collaboration.

These can realize the creation of a new society and life in the local politics.

In addition, the development of local industries can be provided by the local government by improving the learning environment for the development of local industries at the world's most advanced level.

With zero environmental stress that nature and modernized society and live are new life style to be sent from region to the world and all harmony is well lived with nature and technology.

Office to access the world.
