

Regional politics and potentials

Kuroda International Foundation

Takeshi Kuroda

Demand for cleanliness and demarcation of urban and residential areas is planned under politics. Smart city 5.0 and system, technology is all use we can build new life conditions.

Bases of IOT communication infrastructure could create new possibility as we may find now. Industry 4.0 is new possibility all machinery and IT system with the new efficiency of business and production.

All these realities are already existing and we could imagine the futures. Under agreement of all its politics we could realize all these realities.

Financial spending from government could ask own cost efficiency and planned from all consideration to build society and lives.

Detailed plan may ask new reality as lives. These changes and progress of ages may ask new world.

These are without doubt that use of self may create totally new reality and futures. And may dream new system and philosophy to create new lives environments.

These require new political vision to ask all conversation with its peoples. These are all as industry revolution and social revolution of ages.

Social education and life long academic learnings are all bases to recreate the society and new futures.

That politics could ask new own environment to rebuild own reality and society as own community.

**Office to access the world.**
