Similarity between China's siege and Japan in World War II

KURODA International Foundation

Takeshi Kuroda

These realities are clearly exactly the same. It is a demand for Western justice and obedience to it, and the rise and fall of civilization finally faces China, the lord of the Orient.

Japan asked a war with the world in it. The defeat gave them self-subordination.

The clarification is that it is impossible to seek the same reality. The world needs to accept the proposal of a new paradigm. It was the slogan of Hakko Ichiu in Japan, but the reality was the abuse of Asian races.

These are the proposals of a new paradigm that the world allows, dealing with the reality of the Illuminati behind the West, and the proposals of world harmony and ideals that their own words may not be lies, only to ask giving them reality.

To put it simply, we must know that the Islamic word holy war does not give it in gaining lies.

It is, using the Chinese classics, that doing sincerity is that heaven gives this.
