

Construction of the nation with a new society

KURODA International

Takeshi Kuroda

The industry covers any demand of a nation with its own, giving the first time permission to participate in the free trade alliance.

These are the national security to face any change in the future. As above, the nation's recreation could give a wealth of life to the future.

It is necessary to make a change as it must be an evolutionary difference. All new technology is used to create a new reality. It is expanding with political decisions that we have the possibility to the future.

Asking for the independence of all industries, they are creating a new future since we must ask for it properly.

All these require political determination. That gives all these possibilities to have a permit their realization.

These are the massive change in the system and reality. They ask why those new technologies are given not as dreams but realities.

KURODA International proposes basic income for all these realities of its tails.

As we may ask for the reconstruction of the social system.

As mentioned above, we could build a new army forces and space technologies environment. They must link togglers by political presence.

This is all declaration of the future as we have dreamed.
