

Taiwan and the middle east, the world government

KURODA International

Takeshi Kuroda

Facing all realities, may I ask that you may have a choice? It is the same that despair is the only reality under these. We do not have any option Under all these circumstances.

In my way of action, as KURODA International recommends, all its army forces face any world realities. Then we may disclose all truth to the world and all revolution in the world.

We take the card that ace of spade. The world decision we are asking is under all reality of army.

We determine, and we ask the decision of the world.

There we are trying access to the moon bases of the United Nations. That is all reality we are prepared to face against any reality we have in the world.

We are facing the moment as Taiwan matters. All eyes from the world that we may declare.

On the other, we have all struggles in the middle east, and we may ask for all cooperation.

Their castle called word government are at United Nations. We are building our world government against it.

Then there is cooperation under and with space. Then we may ask for all settlement of realities.

We may be wise, and our decision is a war.
