

Taiwan and times with action

KURODA International

Takeshi Kuroda

There we could expect an invasion of Taiwan. That must be the last opportunity we can work for anything.

Under the compliance of international society, we agree that any invasion is a criminal matter as we make its action with its base. And it comes under cooperation between China and Russia.

We may not stand against but rise 3<sup>rd</sup> vision. There is an agreement to abandon wars. Western camp must take action. It is called world war 3<sup>rd</sup>.

It is possible under Asian unity and unified opinion. This causes equal presence to all its invasion matter with Western camp.

There is a tail of the world called the new world order. United nations go forward to the world government.

Then we are trying to show our vision to the world. This is as same as revolution.

Even if there are any tails, we define invasion as an international crime and asking for world recreation.

We may try to push forward Asian unification even under all these matters.

We may insist on ideals or dreams under all these realities since all tragedy contrasts with our plans.

In these circumstances, we may find peoples' opinions. That may permit all our work.
