Create the future

Forwarding to new technological civilization

KURODA International Foundation

Takeshi Kuroda

All its progress of technology makes big change to society and lives. This is new era we put us within. IOT and Industry 4.0, Smart city is all its trend of business.

Space age is top trend of private business. There should be found any progresses with anew at academics.

With a full expectation as Mr. Peter Drucker as mentioned Next society is already realized in part of a reality.

All occurring with changes with society and lives could expect us with totally anew futures.

These are the new decision of the world. Asking the futures may be with all politics. Space age is a reality with a contact to alien. Under all realities asking with a new age expand to new possibility of the world.

These are the right measure to all new technologies. There are more than any differences with all histories but futures.

Top trend is the highest progress always following by the world. These are the revolution of now ages.

There are all changes in society and lives and even economy is asking more ever with all technological progress.
