Liberalism, in its essence, empowers individuals with the right to shape their lives and futures. It is a beacon of hope, a promise of self-determination. Humanism, on the other hand, serves as a mirror, reflecting the realities of these empowered individuals.

To be compared with the others, The reality of authoritarianism and inhumanism is denied to them.

Then, we may have an idea that is our challenge to their realities. This is all the basis for us to set up with our society and life.

An equal relationship may not only be from any powers but also have equal conversations on the same basis. This is a judgment of humanism.

All these are proper ideas for 3rd nations to put their step into the world. And these could change all reality of the world under its diplomacy.

The reality in the West is based on these consensuses and agreements, which are the foundations of their superior society and lifestyle.

If we do this in the East, we will repeat the Cultural Revolution. If we do this in the Orange Revolution, the West will own the East. But if we do this for ourselves, the East will gain a new future. Also, every change in the international situation will give us a new world.

All these are the proof that politics must be wise and educated to know and create reality.

福龍和鳳雛之所以能得天下，是因為他們的智力超群。
